Retailer Pref #1 Credit Card

Retailer Pref #2 Net-30

B2B Terms Used Net-30 & Net-60

⚠ 2.6% payment failure rate (2,155 transactions) requires investigation — may indicate checkout friction or retailer credit issues.

DELIVERY ANALYSIS — 81,837 Shipments

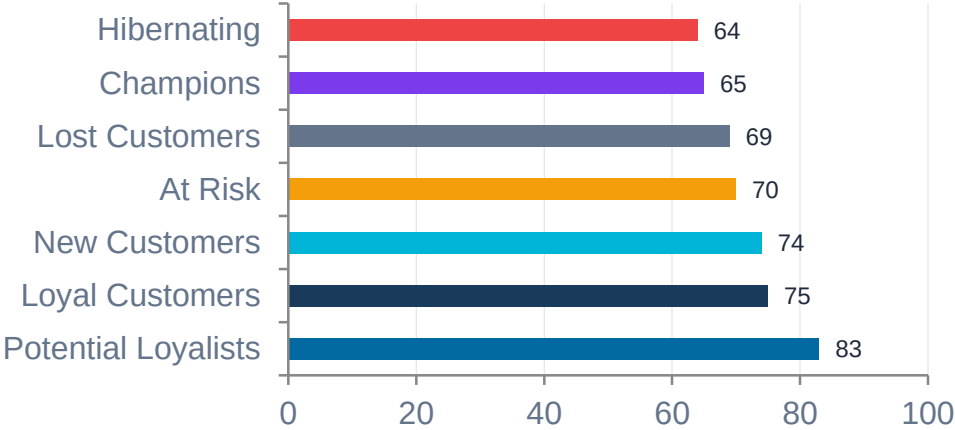

Delay & Environmental Metrics

Avg Delay	12.0 hrs
Max Delay	130.25 hrs
Max Extra Days	5 days
Cold-City Orders	89.3%
Winter Orders	31.4%

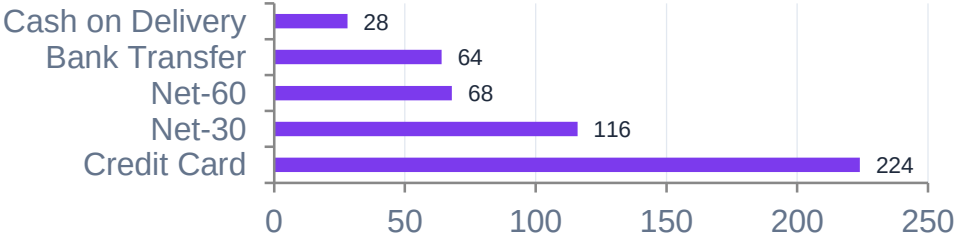

* 89.3% of deliveries operate in cold cities — weather-resilient logistics infrastructure is critical for this network.

RETAILER PROFILE — 500 Retailers · 18 Cities

Retailers by Segment

Preferred Payment Method

Top Cities by Retailer Count

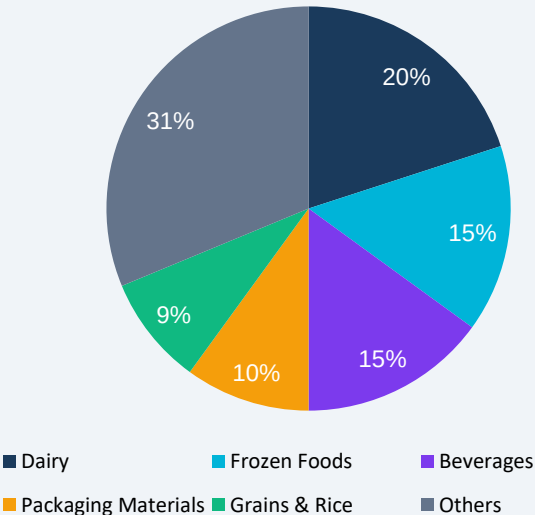

Toronto	97	19.4%
Vancouver	64	12.8%
Montreal	57	11.4%
Edmonton	44	8.8%
Calgary	38	7.6%
Winnipeg	33	6.6%
Ottawa	26	5.2%
Others	141	28.2%

Retailer Cohort Range

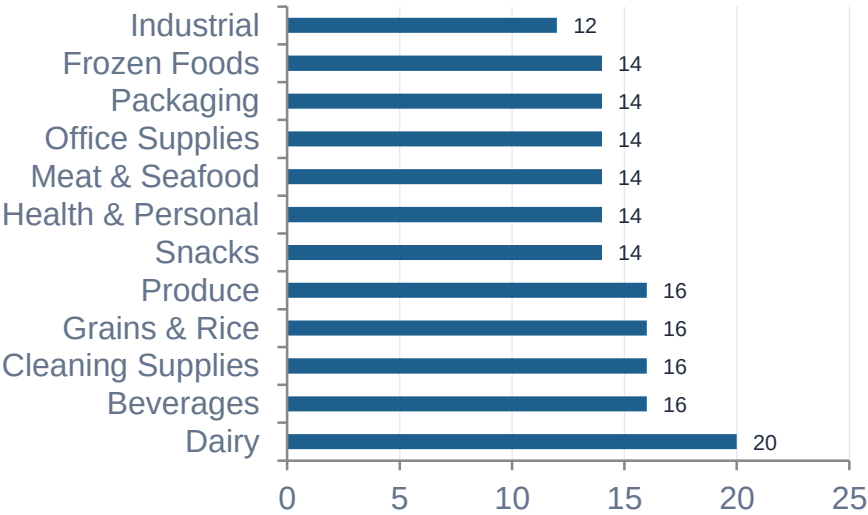

Registration years: 2019 – 2025
8 provinces covered · Ontario leads (42 areas)

SUPPLIERS & PRODUCT CATALOG

Max Product Price

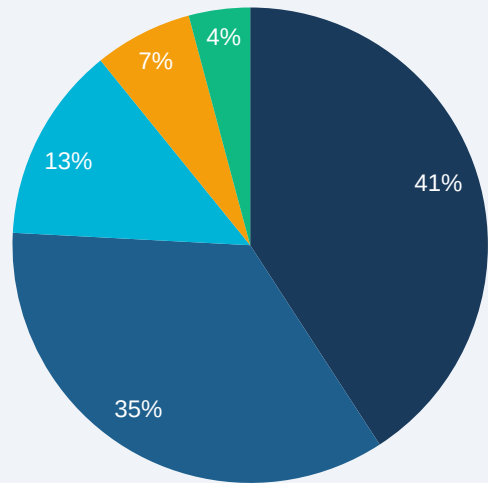

12 categories

Total Product Categories

✔ Dairy dominates supplier network. 12 product categories ensure a diversified portfolio across FMCG, industrial, and office supply segments.

DRIVER FLEET & LOGISTICS INFRASTRUCTURE

Fleet Composition (120 Drivers)

■ Cargo Van ■ Box Truck ■ Refrigerated Truck ■ Pickup Truck ■ Electric Van

Driver Performance Metrics

Total Drivers	120
Active Drivers	110 (91.7%)
Inactive Drivers	10 (8.3%)
Avg Driver Rating	4.08 / 5.0
Min Rating	3.20
Max Rating	5.00

Geographic Coverage

108 delivery areas across 8 provinces · 42 cold areas (38.9%) · Ontario leads with 42 zones

💡 Refrigerated Trucks (16 units) are essential for Dairy & Frozen Foods categories — the top supplier segments. Cold-chain capability is a key competitive asset.

ANOMALY DETECTION — Order × Delivery × Payment Combinations

Cross-table status combinations reveal operational gaps and potential data quality issues.

	Order Status	Delivery Status	Payment Status	Count
Normal — Core Flow	Completed	Delivered	Paid	56794
Watch — Delay but Paid	Completed	Delayed	Paid	6,855
Anomaly — Delivered before Complete	Pending	Delivered	Paid	4,461
Normal — Cancelled Flow	Cancelled	Not Dispat	Refunded	3,995
Watch — Delivered but Unpaid	Completed	Delivered	Pending	3,233
Anomaly — Paid but Delivery Failed	Completed	Failed	Paid	2,044
Anomaly — Delivered, Payment Failed	Completed	Delivered	Failed	1,714

⚠ Key anomalies: 4,461 'Pending' orders show as Delivered+Paid — likely status sync issue. 2,044 orders paid but delivery failed — revenue risk without SLA resolution.

STRATEGIC RECOMMENDATIONS

Priority actions based on operational data analysis

01

Fix Order Status Sync

4,461 Pending orders show Delivered+Paid — data pipeline or status update logic needs immediate fix to ensure accurate reporting.

02

Resolve Paid+Failed Delivery

2,044 orders were paid but delivery failed. Trigger automatic re-dispatch or refund workflows to protect customer trust.

03

Reduce Delay Rate (9.8%)

Focus on cold-city routes in winter months. Expand Refrigerated Truck fleet to handle Dairy & Frozen Foods SLAs.

04

Chase Unpaid Delivered Orders

3,233 completed+delivered orders have Pending payment. Activate automated AR reminders or escalate Net-30/60 collection.

05

Lower Payment Failure Rate

2,155 failed payments (2.6%) — review gateway reliability and offer alternative B2B payment options (Bank Transfer, Net-30).

06

Activate Inactive Drivers

10 inactive drivers represent 8.3% fleet idle capacity. Reactivate or replace to increase delivery capacity during peak months.
